## EMPLOYMENT HISTORY

### **Fasto** - New York, NY

Founder

01/2023-present

- Spearhead the end-to-end product development lifecycle, overseeing ideation, prototyping, design, and engineering.
- Assemble and lead a cross-functional team to drive collaborative success.

### **Stadium Goods** - New York, NY

React Native Engineer

09/2021-01/2023

- Worked with Product Managers to identify feature and clearly defined feature sets into well-scoped user stories.
- Successfully deployed and integrated software engineered by the team for iOS and Android platforms.
- Integrated data analytic APIs for bug reports, user tracking analyses and AI recommendation tools
- Helped implement and maintain high test coverage across the codebase using Jest.

### **Mean Guppy - Verizon** - New York, NY

UX-UI Engineer

03/2020-08/2021

- Delivery of next-generation customer experience (CX) platforms across all lines of business at **Verizon**.
- Core contributor to Verizon's UI component consumed by teams across the business.
- Core contributor to Verizon's Design System's documentation site - Release 2021 Q1.

### **TrainUp** - USA

Lead Instructor

01/2020-present

- Developed and implemented lesson plans covering 40+ hours of instruction to 15 **US Air Force** Software Engineers on React, Javascript, ES6, React Hooks and Redux.
- Provided guidance, technical direction, and evaluated student progress from Junior to Senior Engineers.
- Developed and implemented lesson plans covering 36+ hours of content to US Patent and Trademark engineers on Git, GitHub, JSON, Javascript and RESTful APIs.

## TECHNICAL PROJECTS

### **PropCheck (Swift)** - [GitHub](#)

#### Analyze different Real Estate investment strategies

- Stored data using Core Data iOS native framework to manage models in the application.
- Implemented native frameworks such as Foundation, UIKit, and AppKit to manage app data resources.
- Incorporated CocoaPods dependency manager in order to scale user experience and import external libraries.

### **Best Dishes (Ruby)** - [GitHub Front-End](#)

#### Users rate and review dishes from restaurants in New York City

- Implemented password encryption with BCrypt, User Authentication, and Authorization with JSON Web Token (JWT).
- Constructed Backend in Ruby on Rails and PostgreSQL as a database.
- Built Frontend with React.JS using only functional components and Hooks with Redux as a state management tool.

## EDUCATION

### **Flatiron School** - 2019

Software Engineering Bootcamp

Online - 2018

iOS & Swift - Development Bootcamp

### **Sao Paulo City University** - 2012 - 2015

Bachelor's in Sports and Science
